

Sustainable Development Goals
in education and in action!

About project

Main goal

is to help bring the sustainable development to university students and general public, therefore the result of the project is the university course and the MOOC

Cooperation of 8

European universities
and tech companies

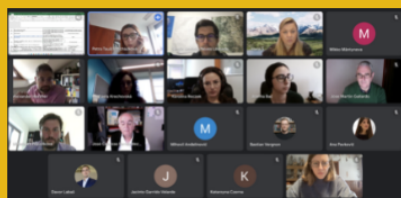

What's new?

TPM1: kick off meeting

22-23 February

where individual partners and the project itself were introduced, as well as the basic strategies were clarified

at the following online meeting on **15 March**, we agreed on **18 final topics** so the phase of creating **the literature review** could begin

on **12 May**, we met again online to give feedback on the literature reviews we had done so that we could start working on the **content of each topic**

The communication platform

February

for project team members has been created

Creation of the project page

March

Creation of the website (first version)

June
